

STICKS AND SIGHTS

SPORTING WOOD AFRICAN SHOOTING STICKS

A staple for hunting in Africa, shooting sticks are still something of a mystery to many North American sportsmen. The sticks offered by Sporting Wood Creations (forgive the name) are the best we've seen. Takedown construction allows for easy transport and gives the shooter the option of a sitting, kneeling or standing shot. The standard model is hickory, but fancier woods are available. (\$189; sportingwoodcreations.com)

TRIJICON RED DOT

The dainty looks of this sight (it weighs less than 0.5 oz.) belie its unbelievable toughness. You don't own a rifle that recoils too hard for this pint-size unit. (\$375; trijicon.com)

AIMPOINT MICRO

This versatile sight is equally at home on a handgun, shotgun or rifle. The 4 MOA dot is precise enough for any hunting or plinking situation. It is waterproof and shockproof as well. (\$580; aimpoint.com)
