## BEST OF BOTH WORLDS

We have two 4x4 vehicles: a fully restored 1969 GMC short bed, step side, that turns heads where ever it goes and a late model Chevy Avalanche loaded with modern conveniences. Each vehicle provides something the other one cannot, so while it would be nice to find a single truck that has it all, we need both.

The GMC demands some attention to drive because there is a little play in the steering, and it needs some room to come to a full stop. There is no fabric headliner to absorb cigar smoke, no carpet to stain, and the side vent windows pass for air conditioning. While the old GMC will go as fast as it needs to, the whining of the 4:56 gears at 55MPH reminds you to slow down and enjoy the ride. On the other hand, it hauled over 100 cords of wood and plowed enough snow to send four kids to college during its first 25 years, and it is still our go-to vehicle when a job needs to be done. It is a family treasure, passed down from father to son. The memories associated with this vehicle make it priceless, and thus it could never be sold.

The much newer Avalanche has the largest gasoline engine GM ever stuffed into a non-commercial vehicle. It goes zero to speeding ticket faster than our insurance company likes and is loaded with every factory option and several aftermarket parts. It is the vehicle we drive when it's important to get from point A to point B quickly and in comfort. It's a pretty good truck, but next year we will trade it in.

Here at African Sporting Creations, we see ourselves as providers of today's treasured classics mixed with enough modern convenience to satisfy our discriminating customers. Our products are crafted with care and designed for reliability in the field as well as pure enjoyment, year in and year out. We combine classic and modern to bring you heirloom quality and cutting edge performance, all in one beautiful package. So go on out and make some memories with any one of the dozens of products found in the following pages, confident that you have finally found the best of both worlds.

Good Hunting,

*Jim & Elisabeth*

# TURNBULL SHOOTING STICKS

Turnbull Manufacturing color case hardened the steel take-down connectors showcased on this new offering. Turnbull is the preeminent practitioner of this timeless process which graced the finest rifles, pistols, and shotguns from the golden age of American firearms production.

For the rigid, kiln dried shafts, select Northern hickory stained a rich walnut or exotic red-toned Jatoba finished with clear poly that highlights the color and graining of this stunning wood. Both species combine strength to support the added weight of the steel connectors and unmatched visual appeal.

We have made thousands of shooting sticks since 2002 and during that time we have perfected our craft. We are pleased to bring you this new model that leverages all of our experience and enables us to elevate the functionality inherent in all of our shooting sticks to a work of art. *Hickory \$429 and Jatoba \$499*

## How do these sticks differ from our Platinum Grade offerings?

- » Extra-soft, hand-sewn, circular American bison leather tops protect the checkering on your fine rifle.
- » Custom made brass sleeves line the holes where the three shafts are joined. This was done to replicate the way high-end rifle maker's accent their locking lug bolts.
- » Beautiful 5 MM mammoth ivory "night sights" inlaid into the two shafts grasped for set-up. This was inspired by bespoke double rifles that used a flip-up ivory front sight for low-light conditions.
- » Concealed screws affix the color case hardened connectors to the wooden shafts without blemishing them in any way.
- » An unobtrusive O-ring at the base of each connector minimizes the possibility of the connectors coming into contact with each other.
- » Weigh approximately 3.5 lbs. or about a pound more than our Aluminum models.
- » Steel color case hardened connectors expertly done by Turnbull Manufacturing.

The 1” diameter exotic wood shaft is very strong, and it is combined with a virtually indestructible take-down connector. The pictures below will give you a good idea of the features we incorporate into one of the nicest products we make. **HEAVY-DUTY BIPOD-PH** Len Taylor from Zimbabwe challenged us to build him a bipod that would be rock steady and virtually indestructible. This is what we created. The 1” diameter construction is super strong, and it showcases the beauty of the three exotic woods pictured on the next page. The take-down connectors are the same ones we designed for the Green Beret snipers to use with the .50 caliber BMG round. These sticks feature thick rubber tops and a heavy-duty canvas carrying case. *\$349 and specify Large (69-75”) or XL (above 76”). Engrave name for \$49-Order by 12/16 for holiday delivery.*

## AFRICAN SHOOTING STICKS

Many years ago we only offered one product: *African Shooting Sticks*.

We set out to make the best ones available and the rest of the business developed from that first, initial product. As a result of the success of our original offering, we have expanded our shooting stick line to include

### UNCONDITIONAL LIFETIME WARRANTY

the widest assortment found anywhere. Every model is designed to fit into an airline approved gun case so you can practice with the same set you take with you during your travels.

## GRAY'S BEST

"Jim has experimented with various woods, improving the design with each generation until now he is close enough to perfect to rate a GRAY'S BEST."

*Terry Wieland, Expeditions & Guides*

*Sirs- I wanted to report that the hickory tripod shooting sticks I bought from you last year have held up to hard use in the Zambezi delta. They were used to pole the 8-wheel drive Argo across a hippo pool when one of the bamboo poles broke, used as walking sticks in heavy black mud through knee to waist deep water and were used to successfully take 3 Cape buffalo and one Roosevelt sable. They cleaned up well, didn't warp, and have a nice dark Zambezi delta mud patina on them!*

*-Scott P.*

**PLATINUM EXOTIC WOOD STICKS**-These are the same ones that received the coveted Gray's Best award in 2009. The rigid, exotic wood shafts come with two pairs of hand-sewn tops that will not snag on brush, one in leather and the other in zebra or buffalo. The anodized take-down connectors are milled out of solid aluminum and have three points of contact for unmatched strength. Use the same sticks the best known PHs in the business rely on season after season and that travel everywhere with Craig Boddington. Heavy-duty canvas carrying case included. Available in the three exotic woods pictured. *Specify Medium (under 68"), Large (69-75") and XL (above 76") \$349. Engrave name for \$49-Order by 12/16 for holiday delivery.*

### SILVER AFRICAN SHOOTING STICKS

These are just as functional as the Platinum exotic wood ones above but without all the bells and whistles. Shafts are Hickory, a tough, rigid wood used for axe handles, and these are combined with anodized take-down connectors. Includes one set of machine-sewn leather tops and carry case. This is the same version Dirk de Bod, the SCI and DSC PH of the Year, has been using for the past 10 years. *For 69'-75" hunters-\$229*

# CARBON FIBER & SUPER COMPACT SHOOTING STICKS

## PLATINUM CARBON FIBER SHOOTING STICKS

are for anyone who wants the lightest and most rigid sticks available. Carbon fiber is four times stronger than steel yet weighs less than aluminum. Standards are approximately 2 lbs, and Featherweights use a shorter connector to save additional ounces. *Full Length Featherweights - \$419, Full Length Standards - \$399, Large (69-75") and XL (above 76"). Engrave name for \$49-Order by 12/16 for holiday delivery.*

Carbon Fiber Shooting Stick

**SUPER COMPACTS** are for those who like to travel with their firearms incognito in a shorter take-down case (Blaser®, double rifles) and need a more compact set of shooting sticks. Instead of one set of anodized take-down connectors, these have two. The shorter wood sections make these sticks even more rigid than our other models. To make sure you can plant them in the ground, pointed tips are always facing down whether you use one, two, or all three sections. These are also our most versatile shooting sticks. Use the top section alone to shoot from the prone position. Use the top two sections (approximately 48" long) for shorter hunters, to navigate tough terrain or to shoot from the sitting/kneeling position. Use all three sections to shoot from the standing position.

**Featherweights**-Weigh approximately 2.5 lbs. and use red-toned African Sapele, a light-weight but very rigid exotic hardwood for the top and bottom sections. Hickory stained a medium brown color is used for the middle sections. **\$399**

**Standards**-Weigh approximately 3.5 lbs. and use hickory stained medium brown for all sections. **\$349**

Large size fits hunters 69"-75", and the longest section measures 26". XL fits hunters above 76", and the longest section measures 28" (will fit in a Blaser® case). *Engrave your name on the connector for \$49. Order by 12/16 for holiday delivery.*

Awesome products. Great fit and quality on the Selous boots. The Courteney® sling looks great on my Dakota® Model 10. The culling belt works great with .375 H&H ammo just like you said it would. The shooting sticks are the sturdiest I have ever used. The whole outfit will look right at home on the Caprivi Strip in 2016. Thanks for such great products!
