OVER 100 NEW PRODUCTS INSIDE & 100'S MORE AT
www.AfricanSC.com

When we began in 2003, almost everything we sold went to Africa for use on a safari. In 2007, when the recession hit, we put together a small, unique collection of lifestyle and home décor products that people could enjoy while staying a little closer to home. That new, exotic collection was a huge success. Today, most of our products are enjoyed on a daily basis and many never leave the country. This natural evolution is captured by our new tag line;

ADVENTURE DELIVERED DAILY™

While most of our customers enjoy adventure, each of you defines what that means in your own unique way. Regardless of how you define it, our hope is that you will allow us to be a small part of whatever type of adventure you enjoy.

For over a decade, you have relied on us to provide specialized safari gear engineered to excel in one of the most unforgiving environments on the planet. That will not change. What will change are the number of new categories we enter into and a faster tempo of new product introductions.

Offering unique products has been instrumental to our success and on that note... we are pleased to announce we have been appointed the US Master Distributor for Els & Co. Fine Leather out of South Africa. Their hand-made, thick leather products have to be seen to be appreciated. The ruggedness, attention to detail and functionality they build into every piece is incredible!

Our partnership with Arno Bernard Knives is going even better than we imagined. That is why they earned more than half of the twelve additional pages that make up this year's catalog. Please take a look at their new collections, most of which are available nowhere else.

Thank you for joining us on this exciting adventure and e-mail us at info@africansc.com to share your thoughts.

Best Regards,

Jim & Elisabeth

OUR FIRST PRODUCT

Many years ago we only offered one product: **AFRICAN SHOOTING STICKS.** We set out to make the best ones available and the rest of the business developed from that first, initial product.

Our typical customer purchases up to a half-dozen, less expensive, aluminum shooting sticks before they finally “invest” in a set of ours. While our sticks “cost more” they will save you money over the long run and your grandchildren will be proud to use them one day.

The biggest difference between our Shooting Sticks and everyone else's, is our bullet-proof connector. It is milled from a solid block of aircraft aluminum and has three points of contact for unmatched strength. Competitive connectors usually rely on plastic or thin, stamped metal pieces to function which explains why they typically offer a one-year limited warranty versus our unconditional, lifetime warranty.

In addition to being strong, they are also stealthy. The most unnatural sound in the wild is a metallic one and a hollow aluminum tube with pointed metal bottoms can make noise that scares off game. Our solid wood shafts and pencil sharpened wood or polymer bottoms are the quietest on the market and help you get in close.

No one ever regretting owning the very best and our Shooting Sticks have earned a cult-like following among PH's and serious hunters all over the world. Read for yourself why people who hunt for a living (or live to hunt) consider them without equal!

UNCONDITIONAL LIFETIME WARRANTY

Absolutely the finest sticks available today are made by African Sporting Creations. Custom built for your height, they are available in various exotic hardwoods; are fitted with buffalo, zebra, or other exotic leather; and can be engraved with your name. While you might think they'd be heavy, they're actually lighter than competing metal and plastic versions, and they are far more durable. I've broken a few sets of modern sticks and have seen many more broken, but even African PHs, who work their shooting sticks incredibly hard year-round, don't wear out or break those made by African Sporting Creations.

Shooting sticks have become standard tools for hunting in many places around the globe. A solid pair of sticks provides you with a steady platform from which to deliver an accurate first shot, regardless of the terrain. African Sporting Creations offers a line of handmade sticks designed to last forever and backed up with an unconditional lifetime warranty.

GRAY'S BEST

Jim has experimented with various woods, improving the design with each generation until now he is close enough to perfect to rate a **GRAY'S BEST.**

Terry Wieland
Expeditions & Guides

I am a firm believer in "African style shooting sticks" and have been using sticks from African Sporting Creations for several seasons. This year African Sporting Creations' screw-in tripod has become a permanent part of my gear. I took them to Pakistan in January where I used them "short" to take a Sind Ibex and "long" to take a Himalayan Ibex at long range in deep snow. Right now I am in Argentina - and you can bet my sticks are here with me!

SUPERCOMPACTS & CARBON FIBER STICKS

SUPERCOMPACTS are for those who like to travel with their firearms incognito in a shorter take-down case (Blaser®, double rifles) and need a more compact set of shooting sticks. Instead of one set of anodized take-down connectors, these have two. The shorter wood sections make these sticks even more rigid than our other models. To make sure you can plant them in the ground, pointed tips are always facing down whether you use one, two, or all three sections. These are also our most versatile shooting sticks. Use the top section alone to shoot from the prone position. Connect the top section to the bottom ones, which feature quiet wood points to shoot from the kneeling position or to make a 48" walking staff for navigating rough terrain. Use all three sections to shoot from the standing position.

Featherweights-Weigh approximately 2.5 lbs. and use light-weight but very rigid exotic African hardwood for the top and bottom sections. Hickory stained a medium brown color is used for the middle sections. \$399

Standards-Larges weigh approximately 3.0 lbs. and use hickory stained medium brown for all sections. \$349

Large size fits hunters 69"-75", and the longest section measures 26". XL fits hunters above 76", and the longest section measures 28.25" (will fit in a Blaser® case).

CARBON FIBER SHOOTING STICKS

PLATINUM CARBON FIBER SHOOTING STICKS

are for anyone who wants the lightest and most rigid sticks available. Carbon fiber is four times stronger than steel yet weighs less than aluminum.

Standards weigh approximately 2.5 lbs - \$429

Large (69-75") and XL (above 76").

AFRICAN SHOOTING STICKS

SHOOTING STICKS: FREQUENTLY ASKED QUESTIONS

■ How quickly do they ship?

We ship stock Shooting Stick orders the next business day. If you want the connector engraved with a name or initials, it will add 7 business days to the delivery time.

■ What size should I order?

We provide size information based on your height. If you are between sizes or plan to take steep uphill shots (need them longer to avoid scope eye) we recommend the next larger size as you can always work with a set that is a little too long. If they are too short, in addition to the risk of "scope eye" the "V" at the top that supports the fore end will be too close together and since it will not be wider than your fore end, the far leg has a tendency to kick out during recoil.

■ What are the most rigid models you offer?

All of the models offered are very rigid and keep in mind that you do not have to press your rifle down into them to improve accuracy. They are simply a rest for your rifle and another point of contact. If you exert a lot of downward pressure, your muscles will fatigue and your groups will actually get larger.

■ How long are they when taken apart?

All of our models unscrew and can fit in a full-length rifle case. Larges range from 36-38" and XL range from 38-40" long. If you are traveling with a take-down case or want to put them in a duffel bag, then our large or XL SuperCompacts will fit in either with an ID length of at least 28.25."

■ How much do they weigh?

Domestic wood, large-sized sticks weigh approximately 2.5 pounds. Exotic wood sticks weigh a half-pound more due to their greater density, but this is still less than most premium Aluminum tripods. SuperCompact Hickory domestics weigh approximately 3 pounds (Featherweights weigh ½ pound less) due to the extra set of connectors which increase their versatility and allow them to unscrew to a shorter length.

■ Do you repair them?

Yes, but we have only done this less than a dozen times in 15 years. If you need a repair, simply send them back with a note explaining what you need done. If you need parts you have lost or worn out, simply order them online.

SILVER AFRICAN SHOOTING STICKS

These are just as functional as the Platinum exotic wood ones, but without all the bells and whistles. Shafts are Hickory, a tough, rigid wood used for axe handles, and these are combined with anodized take-down connectors. Includes one set of hand-sewn leather tops and carrying case.

This is the same version Dirk de Bod, the SCI and DSC PH of the Year, has been using for the past 10 years.

Large: for 69'-75" hunters - \$229

XL: for hunters 76"+ - \$249

AFRICAN SHOOTING STICKS

PLATINUM EXOTIC WOOD STICKS

These are the quietest and toughest sticks on the market and are the same ones that earned the coveted Gray's Best award in 2009. The rigid, exotic wood shafts come with hand-sewn, Cape buffalo tops that will not snag on brush. The anodized take-down connectors are milled out of solid aluminum and have three points of contact for unmatched strength. Use the same sticks the best known PHs in the business rely on season after season and that travel everywhere with Craig Boddington. Heavy-duty canvas carrying case included. Available in the three exotic woods pictured below.

Specify Medium (under 68"), Large (69-75") and XL (above 76") - \$349.

DARK CONTINENT SHOOTING STICKS

Red, black and brown are the colors most commonly found on Maasai warrior shields and that is why we selected three stunning exotic woods in the same colors for this exciting new model. The wood shafts are hand-finished from African Sapele (red), African Wenge (black) and African Shedua (brown). We engrave each of the top three connectors with the names of its wood species so you will always remember them. The sticks are available in large length only (fit those 69"-75" tall), weigh less than 3 pounds, and are 36" unassembled.

Our Dark Continent Shooting Sticks are perfect to hang a favorite hat or binoculars from in a special corner of your trophy room or to commemorate a special hunt with your son or daughter. They are a great gift to your PH or to use on your next hunting trip locally or abroad. – \$449

Engrave name for \$49 | Order by 12/15 for holiday delivery.

All sets come with the following:

- Gray hippo or gray elephant hand-sewn, leather tops
- Shock cord holes lined with custom brass sleeves
- Mammoth ivory "Night Sights" so you know which two legs to grasp for set-up
- Three anodized aluminum connectors engraved with the name of the three wood species
- Heavy-duty canvas carrying case
- The only option offered on these top-of-the-line sticks is engraving the lucky recipient's name in the wood of the middle shaft.

NEW BUILD YOUR OWN EXOTIC WOOD STICKS

We are pleased to offer you the option of building your own set of Shooting Sticks to your specific requirements and tastes. The most common shooting stick questions we get asked are; which are the best ones and which one should I buy? The answer depends on what is important to you.

If **VERSATILITY** is your primary concern, we recommend our SuperCompacts, as depending on how many of the three sections you use, they can help you make shots from the prone, sitting/kneeling and standing positions. If weight is also a concern, then our Featherweight SuperCompacts would be the ideal choice as they only weight 2.5 lbs. If you are over 6' 4" tall, then tell us how tall you are and we can make this model to work for people up to 7' tall, which is something we cannot offer on our traditional, two-piece models.

If **WEIGHT** is your primary concern we have two different options and we have already covered the most versatile one of them above. Our two section Featherweight (2.0 lbs.) Acacia Shooting Sticks weigh approximately half as much as many of the premium Aluminum Shooting Sticks on the market and are stiffer and much quieter. These are lighter than the Featherweight SuperCompacts, as they only have one set of Aluminum connectors.

Throughout the centuries, leather has always been synonymous with quality, a product that can be passed down for generations. When cared for properly, it ages like a good bottle of red wine, becoming more than what it was when made. Exceptional products have to start with the best components available and the leather, canvas and brass used is sourced from around the world and without equal.

Their products are crafted from the best quality, top grain, extra-thick, vegetable tanned leather. To achieve an old school finish, they brush dye the leather, then oil it with own mixture of beeswax and animal fat. After molding the leather, it is painstakingly hand-stitched, a lost art that looks and feels like it was made 100 years ago. The result is a product that will last several lifetimes.

Finding skilled craftsman in a mass-produced world is no small feat and this is the most important part of their mission. Els and Co primarily employs Xhosa women because that tribe is one of the proudest in the world. To learn to be an exceptional craftswoman, you must first take pride in what you do. Each woman working at Els and Co. is trained from scratch, so they can learn the labor intensive process of crafting fine leather products without any bad habits. Every product is proudly stamped with the initials of the craftswoman who brought it to life.

Arno Bernard Knives are crafted in Africa and place a little bit of adventure in your hand every time you hold one. Their father, who has been making custom knives for decades, taught the four sons the proper way to craft a knife and each one of them has mastered a key part of the process that produces their exceptional creations.

HANDLE MATERIALS: *Responsibly Sourced, Expertly Crafted.*

MAMMOTH TUSK-BARK

Buried millions of years ago and the exterior has been dyed by the minerals in the surrounding sediment.

MAMMOTH (INNER) TUSK

The creamier coloration found on the inside of the tusk.

MAMMOTH MOLNAR

Distinctive striations and is polished to create a beautiful handle.

DESERT IRONWOOD

A stunning grain pattern that usually includes burl and/or multi-colored striations.

KUDO HORN

A unique cell-like structure that is buffed to a high shine and makes for a striking handle.

DYED WARTHOG

Created by forcing dye into the softer areas under pressure which stabilizes it and produces a dramatic look.

NATURAL WARTHOG

A creamy white ivory, usually with a contrasting band of color at the gum line.

GIRAFFE SHIN BONE

Giraffe Shin Bone is very dense and when dyed, produces a handle that is both durable and beautiful.

SHEEP HORN

Sheep Horn is naturally stabilized and the exposed ridges provide this material with light and dark bands of color.

G10

G10 is a laminated product that is incredibly tough and machines like steel.

ARNO BERNARD® KNIVES: FREQUENTLY ASKED QUESTIONS

■ What type of steel is used?

Stainless Steel knives use Bohler N690, a high quality stainless steel which is then heat treated and tempered, that hardens the blade to a 59-60 on the Rockwell hardness scale. This level of hardness holds an edge very well, but is not so hard that it is brittle or difficult to sharpen. Damascus knives utilize Damasteel® stainless steel which is the best that money can buy.

■ How quickly do you ship?

We stock over 300 knives across more than 60 styles to ensure almost all stock knife orders ship the next business day.

■ How are the knives sharpened?

Each one is hollow ground (done on a wheel) by hand, by Franco Bernard.

■ I am thinking about giving one of them as a gift, can I get the lucky recipient's name or initials engraved on the knife?

Yes, you can get any stainless steel knife with a mammoth handle (Inner tusk or molar) engraved for only \$49. Please note this adds about a week to the delivery time and once a knife is personalized we are unable to accept returns. Due to the striations on the Damascus knives, we do not offer engraving on them as it detracts from the beauty of the piece.

■ What about the sheaths?

There are three types of sheaths available, in two types of leather and each of them is hand-sewn by Juan Bernard. The Bongo, Badger, Bateleur and Marmoset models come with their new locking safety sheath in thick, bovine leather. All other stock knives come with a traditional wrap-a-round bovine leather sheath that covers more than 3/4 of the entire length of the knife. The third option, only available on the Build Your Own Fixed Blade Damascus Knives (page 24) is a "Safety Sheath" which holds the knife at a 45 degree angle for those who spend a lot of time on horseback, in a vehicle or want additional concealment as this can be worn behind you. All other Mammoth Bark and Mammoth Molar handled knives come standard with an upgraded sheath in real Ostrich Skin Leather, which is an ASC exclusive offering.

■ What if I lose my sheath?

We inventory almost all their sheaths and you can simply order a replacement online or just give us a call. Go online to see what model you have as these are ordered by the knife's model number.

■ Do you accept custom orders?

Yes, if you want a knife built to your particular taste, we are happy to order those for you with a 120 day delivery time. Please see how the "Build Your Own Fixed Blade Damascus Knife" process works on page 24. Please note, we are unable to accept returns on knives built to your unique specifications.

2018 MARQUIS SHEATHS

Each knife includes a custom, hand-sewn safety sheath that holds your knife securely in place by locking the bead under the clasp. Ostrich leg is standard on all mammoth molar or mammoth tusk knives and bovine is used for all others.

2018 MARQUIS COLLECTION

BONGO

An efficient drop point design perfect for medium sized game. It will be your "go to" knife for any whitetail or plains game excursion.

BADGER

For those who prefer a bit more of a clip point design, the Badger is a great design for processing small game, fowl, and even deer-sized animals

BATELEUR

A bird and trout knife that can also be used for caping; and with its new locking sheath design, it is also an excellent EDC knife.

MARMOSET

Great for use on fowl but with a bit more belly than the Bateleur. Perfect for processing small-medium sized game, it also excels as a beautiful EDC.

ARNO BERNARD® SLIP JOINT KNIVES

RINKHALS SLIP JOINT FOLDER

Sheep Horn  

Giraffe Shin Bone  

This Arno Bernard knife takes you back to simpler time, when your first pocket knife opened and closed without any locking mechanism. Earlier this year, a well-known US maker took home the “American Made Knife of the Year” with a slip joint design. This updated version of the classic slip joint is 6.5” overall with a 2.8” blade and a full sized 3.7” frame with a 2.8” handle inlay. It features a beautiful design with a versatile, RWL34 stainless steel blade, a nail nick for easy opening and a thumb notch for comfort. Just like your old Buck®, Western® or Case®, the blade features a mirror finish. The hand-sewn, leather slip protects it in your pocket and the matching bead attached to the leather lanyard makes it easy to access. This lightweight knife sheds ounces by using Titanium for the frame, pocket clip, collar and screws and only weighs 2.3 ounces!

The slip joint mechanism of this knife features an innovative “safety” when it is approximately halfway open which causes the blade to be under very little tension so it is easy to move your fingers out of the way before tension builds again and assists you in closing (or opening) the knife. Most slip joint knives have continuous tension throughout their entire range, which in some cases causes the blade to close before you can get your fingers out of the way. Since this knife does not have a mechanism that locks it open, always cut with the blade going away from you to prevent injury.

There are two naturally stabilized choices for handle inlays; natural sheep horn or dyed giraffe shin bone. Special introductory price of \$349 – *Sheep Horn* (above left) and \$369 – *Giraffe Shin Bone* (above right) for the first 30 knives (15 Sheep Horn and 15 Giraffe) we are targeting to ship to customers before the end of 2018. Place your order today as after those are sold, the price for each model will increase by \$50.

ARNO BERNARD® KNIVES

CASED SET OF SIX STEAK KNIVES

This will add elegance to any meal. No expense was spared in the creation of these one-of-a-kind sets. The knives are 8.1" overall with sleek, contoured 4.05" handles that showcase the stunning beauty of polished Mammoth Molar which is millions of years old or hand-buffed ivory Warthog tusk. Five stainless steel pins on each side keep the handles securely fastened to the full length tang. The N690 Bohler stainless steel blade is 4.05" long and Franco Bernard puts a razor sharp, hollow ground edge on every one.

The custom crafted, African mahogany presentation case measures approximately 11.3" wide x 4" deep x 2.3" tall and features recessed brass hinges, a magnetic closure and contrasting exotic wood highlights on all four corners. A center divider keeps the knives securely separated, with three knives to a side. Hand wash in warm water and hand dry. Do not put in a dishwasher. *Mammoth Molar (on the left) – \$2,995 | Warthog Tusk (on the right) – \$1,495*

CUSTOM-MADE OLIVE WOOD KNIFE DIPLAYS

These custom-made olive wood knife diplays are available in two versions that will hold three or six knives. Olive wood is a stunning exotic wood with an abundance of character provided by knots, cross-graining and burls. The three unit display is 13" tall, 6-8" wide and approximately 7/16" thick. The six unit display has a similar width and thickness but is approximately 26" tall. Knives are securely held in place by the shelf they sit on and by the grooves cut in the polished, real ivory warthog tusks. Three knife displays are perfect for smaller collections and the six unit one is great for steak knives on a sideboard or larger collections.

THE COURTENNEY® BOOT COMPANY: FREQUENTLY ASKED QUESTIONS

■ How quickly do they ship?

Almost all stock Courteney® orders ship the next business day. We stock more than 20 styles and over 400 pairs in Ohio. Even if we do not have the exact model you want, we can send you something very similar, if you need them quickly.

■ Do you accept custom orders?

Yes, please see our Build Your Own Exotic Boot section for details. If you want a boot built to your particular specifications, you can expect delivery in approximately 120-150 days. One of our most popular custom orders is for the higher Patrol in black Cape buffalo to meet military, pilot and law enforcement dress code requirements. Please note we are unable to accept returns on boots built to your particular specifications.

■ What size should I order?

If you are a current Courteney® owner, order the UK size stamped in the top right and left hand corner of the logo patch located above the heel. If this is your first pair, simply provide your US size and we will send you the equivalent UK size. All the styles we offer are available in half sizes.

■ How are the men's styles cut?

The boots run wide so if you have a wide foot (E or EE) they will fit you right out of the box. If you have a narrow-regular width foot (up to a D width), then order one of the three narrow-regular width styles we offer.

■ Do they have a lot of arch support?

They are cut relatively flat so if you have a pronounced arch we recommend you order a set of our SOLE insoles which quickly mold to your feet. The medium red insoles typically take up about a half size so if you are ordering those we suggest ordering your boots a half-size larger. If you are "between" sizes, the thin gray insoles usually take up any extra space.

■ What socks do you recommend?

We recommend the Rohner Trekking socks from Switzerland. They are heavily cushioned and the Merino wool wicks moisture away from your feet.

■ Are Courteney® Boots waterproof?

All of the Courteney boots are treated to be water repellent but they are not waterproof. The application of the Courteney conditioner will keep them water repellent. Due to the hot temperatures in Africa, these boots are designed to breathe so that moisture does not accumulate and cause blisters. To be truly waterproof, you need some type of membrane (for example, GORE-TEX) but boots with that type of material are typically too hot for Africa as they do not allow moisture to evaporate freely.

■ Do you offer ladies styles?

Yes, we offer three different ladies styles but can custom order anything you want with a 120-150 day delivery time.

■ What is your return policy?

Try any boot we stock in your home and if you need a different size or want to return them, just send them back and put a note in the box telling us how you would like to proceed. No return authorization is required.

WHAT COURTENNEY® BOOT CUSTOMERS SAY ABOUT THEIR BOOTS

Courteney®
HANDCRAFTED ADVENTURE FOOTWEAR

I own two pairs of Courteney boots, had them for years; very comfortable and wear forever. Not cheap, but they last a lifetime.

They are great! I have 2 pairs - both are equally as comfortable and built to last.

I bought a pair of the Selous style around 20 years ago. You cannot wear them out. They offer great ankle support, comfort and take on any environment.

EXOTIC COURTENEY® WIDE WIDTH BOOTS

NILE CROC SAFARI IN CHOCOLATE (left) AND TOFFEE (right) -The tough and beautiful belly skin of this apex predator is showcased on luxury goods from around the world and adorns everything from luggage to designer purses. Boots costing more than twice as much use less than half the crocodile hide of this model and usually take half a year or more to have custom-made. The casual cleat sole in natural rubber makes this model ideal for office use or a night on the town.
Men's US 8-12. – \$999

Constructed entirely by hand from Cape buffalo hide uppers, each is as individual as the serial number it bears. These are made without a water-proof membrane to allow them to breathe freely which makes you less susceptible to blisters. We inventory over \$100,000 of their fourteen most popular styles in Ohio so orders ship the next day. Wear the legendary safari boot of Africa on your next adventure!
